

MUHAMMAD ARGA PRADANA

Address: Jalan Raya Candi V No. 726, Karangbesuki, Sukun, Malang
Phone: +62 87758456674
Email: argad5033@gmail.com

ABOUT ME

I am a student who has a great interest in the field of Information Technology, especially in developing web applications and implementing technology-based digital solutions. I have experience in building interactive and responsive web interfaces using Laravel, HTML, CSS and JavaScript. Apart from that, I have also developed a simple Arduino-based automation system that is integrated with a web platform.

EDUCATION

Information Technology	2024 - present
Brawijaya University IPK: 3.75	
Social Sciences	2021 - 2024
Senior High School 1 Patianrowo	

INTERNSHIP EXPERIENCE

The Movie Dhermaganing Ati by Novian Ramadhani Zuhri	March - May 2025
Production of the film "Dhermaganing Ati"	

ORGANIZATIONAL AND COMMITTEE EXPERIENCE

Vocational Faculty Student Congress (KM FV)	2025 - 2026
<i>Second Presidium of the Student Congress.</i>	
Vocational Faculty Student Representative Council (DPM FV)	
<i>Intern Staff of the Media and Information Bureau (MEDINFO)</i>	Oct - Dec 2024
Head of the media and information division for the Election of Vocational Faculty Student Representatives (PEMILWA FV) 2024 work program.	
<i>Expert Staff of the Legislative Body (BALEG)</i>	March - Dec 2025
- Chief executive for the First Gathering Vocational Legislative United (VALUE) committee 2025 work program. - Competition supervisor and staff member of the events division for the Vocational Legislative United (VALUE) 2025 work program. - Head of the verification committee division for the Election of Vocational Faculty Student Representatives (PEMILWA FV) 2025 work program. - Head of the equipment division for the Vocation Student Legislative Exchange and Innovation (VISION) 2025 work program. - Master of Ceremony for the First Gathering of Student Council Intern Staff 2025 work program. - Master of Ceremony for the Education and Training of the Student Representative Council (DIKLAT DPM) 2025 work program.	
Student Association of the Information Technology Study Program (HMPS TI)	
<i>Expert Staff of the Department of Research and Technology (RISTEK)</i>	March - Dec 2025
- Chief executive for the Tech Talks 2025 work program. - Head of the sponsorship and consumption division for the Tech Fair 2.0 2025 work program. - Head of the sponsorship and consumption division for the IT Charity 2025 work program. - Head of the sponsorship and consumption division for the "Think Solve Inovation" seminar 2025 work program.	

Islamic Student Association (HMI)

Islamic Student Association Cadre

2024 - Present

- Second Presidium of the Member Meeting of the Islamic Student Association Commissariat 2024 work program.
- Head of the equipment division for the Inauguration of the Islamic Student Association Management 2024 work program.
- Head of the equipment division for the Islamic Student Association Cadre Basic Training 1 (LK 1) 2025 work program.

Introduction to Campus Life for New Students in the Vocational Faculty (PKKMB FV)

July - Oct 2025

- Person in charge and staff of the SPV division.

PROJECT EXPERIENCE

Catering Order Website Project

- Developed a food catering ordering platform using Laravel, Blade, MySQL, and Tailwind CSS, featuring dynamic menu management, an interactive shopping cart, order checkout processing, and user authentication.
- Built a responsive admin dashboard utilizing Tailwind CSS to manage order statuses, perform menu CRUD operations, and export order and customer datasets from a MySQL database.

Health Education Website Project

- Developed a digital health and wellness platform using PHP, Tailwind CSS, and MySQL to dynamically deliver fitness articles, workout video tutorials, nutrition guides, and personalized lifestyle recommendations.
- Created a dedicated user portal for profile customization and content suggestions, along with a secure administrative dashboard to manage, update, and delete health content efficiently.

Arduino and Website Project for a Smart Infusion Monitoring System (SIMS)

- Developed a real-time patient infusion monitoring system featuring CRUD operations for patient records, automatic Drops Per Minute (DPM) calculations based on infusion drip sets (Micro/Macro), remaining time estimation, and digital charting.
- Utilized a modern web stack including React.js for the frontend UI, Tailwind CSS for styling, Inertia.js as a seamless data bridge, and the Laravel framework for database management and REST API.

Arduino and Website Project for a Smart Room

- Developed a smart room IoT monitoring system using Laravel, Blade, MySQL, and Tailwind CSS to ingest and process real-time sensor data (temperature, smoke, and humidity) from active hardware nodes.
- Engineered an automated rule engine to log system activities in a MySQL database, paired with a responsive Tailwind CSS dashboard for live sensor visualization and actuator command queue tracking (e.g., exhaust fans and sprinkler activation).

Focusly Mobile Project

- Developed a mobile productivity application using Flutter and SQLite, integrating interactive Pomodoro timers, subtask tracking management, and local database persistence.

ADDITIONAL INFORMATION

Skills

- Software: Microsoft Office.
- Design UI/UX: Canva, Figma.
- Bahasa: Bahasa Indonesia, Bahasa Inggris.
- Pemrograman: HTML, Java Script, Python, React.js, Next.Js.
- Lainnya: Public Speaking, Teamwork, Problem Solving, Time Management, Team Leadership.
